Reveal Yourself

**If you think you know peels,
it's time for a major reset ...**

Full strength, medium depth for
effective resurfacing & revitalization

Micronized exfoliation - no pain,
frosting, flaking or peeling

Customized to your needs & goals

All skin types, all seasons

This is "TRUE Zero Downtime"

The **CHRYsalis™** Peel System

Resurface & Revitalize Without Peeling:
experience the miracle of micronized exfoliation!

So what's new & different from your previous peel experiences?

The CHRYsalis™ Peel System is **smarter**. The carefully curated and functionally targeted blend of acids and proprietary performance enhancers enables you to accomplish improved clinical effect, without “brute force.” CHRYsalis™ removes dry, dull & dead skin and stimulates formation of collagen and elastin for renewed, healthier skin structure. Dead skin cells slough gradually, micronized to the cellular level:

Like the dust off a butterfly's wings.

The CHRYsalis™ System **simultaneously heals**: the formulation proactively manages the downsides of peel-induced trauma to accelerate the path to the desirable outcomes – stimulation of fibroblasts, increased production of collagen & elastin, and regeneration of the extracellular matrix. Your skin will show improved structure and “snap.”

True Zero Downtime

- Full-strength, medium depth blended acid peel for targeted stimulation
- No burning or pain, just a mild sensation of warmth
- Micronized exfoliation: **NO frosting, flaking or peeling**
- Improves pore size, fine lines & wrinkles, tone, texture, and skin structure & resilience
- You'll immediately notice your skin is more radiant, supple, and deeply hydrated
- Safe for all skin types & all seasons

CHRYsalis™, made in Italy by Derm Qode Lab, is the brainchild of dermatologists and aesthetic industry professionals with a track record of successful innovations in biorevitalization and collagen stimulation. Typically new products from Europe or Asia take 6-8+ years to reach the U.S. This FDA-registered System is available to you just two years after its launch.

Formulation-Matched Home Therapy

The CHRYsalis™ System is a holistic and lifestyle-friendly approach to skin revitalization ...

The treatment sequence of once a week for four weeks is **easily scheduled over lunch, during a coffee break, or between appointments because of the remarkable “true zero downtime” experience.**

How you treat your skin at home is just as important as how your provider treats it in clinic. You also receive exceptional, dermatologist-formulated & matched product for hydration and recovery support:

For your vanity ...

Q.SUPREME Daily Moisturizer

Use in the morning and evening, and as needed during the day. Rich yet not oily, and easily absorbed with a pleasant, light scent from the natural and sustainably sourced ingredients.

For on-the-go ...

Q.ILLUME Daytime Hydrator

A delightful, medium weight emulsion for on-the-go, full face hydration that can be applied over makeup. Illume is also excellent for around the eyes (dark circles, puffiness and wrinkles) as well as oily patches where moisturizer may be too rich.
